750 Series - Multifunction

Compact solenoid multi-valve | 2/2 and 3/2 integrated functions

PNEUMATIC DIVISION

www.matrix.to.it sales@matrix.to.it

S.V. 750 MULTI - FUNCTION SERIES • 2/2 - 3/2

750 multi-function Series encloses 8 separately controlled shutters in a single body. Its base version has 8 outputs with the following configurations:

- four 3/2 NC outlets four 3/2 NC outlets.
- two 2/2 NC outlets.
- two 2/2 NO inverted flow outlets.

The extreme modularity of 750 Series allows the arrangement of an almost unlimited number of customized configurations. For this aim, contact you local dealer or MATRIX technical staff.

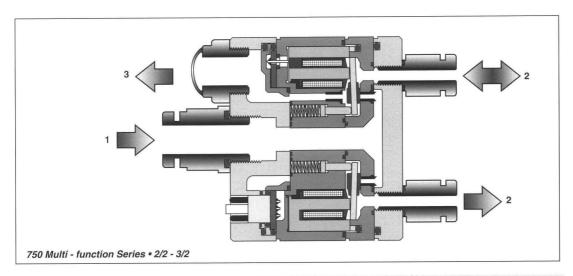

750 multi-function Series is particularly fit for the control of intricate pneumatic system, where different functions are integrated.

In the present model, all the innovations offered by Matrix technology (this combines special dynamic performance to the simplicity and reliability of manufacture) are present. Response times are of millisecond range, while operation life is over 500 million cycles.

With a speed-up kind control, dynamic characteristics are even more improved. Standard 12/24 VDC control solenoid valves have a response time lower than 5 ms in opening and than 2 ms in closing, with a maximum operation frequency 200 Hz. Speed-up control solenoid valves have a response time lower than 2 ms both in opening and in closing, with a maximum operation frequency of 300 Hz.

Besides high-speed characteristics, 750 Series solenoid valves offer flow rate values up to $100 \, \ell$ /minute (ANR) for every single outlet, with feeding (supply) pressure from 0 to 8 bar.

For 750 multi-function series, a lot of accessories is available, such as IP 52 or IP 56 connectors, manifolds with different positions and speed-up driver boards.

Advantages

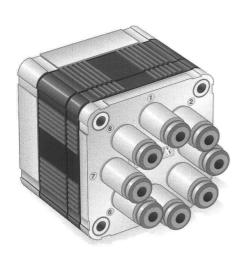

- · Compact dimension.
- · Short response times.
- Insensitivity to frequency work and to vibrations.
- · Low absorbed power.
- · Precision, repetitiveness and flexibility.
- · Long operating life.

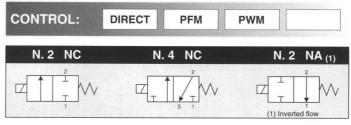

Applications

- · Process and precision instrumentation.
- · Pressure and flow rate control devices.
- · Positioning systems.
- · Biomedical and measure sector.
- · Robotics and industrial automation.

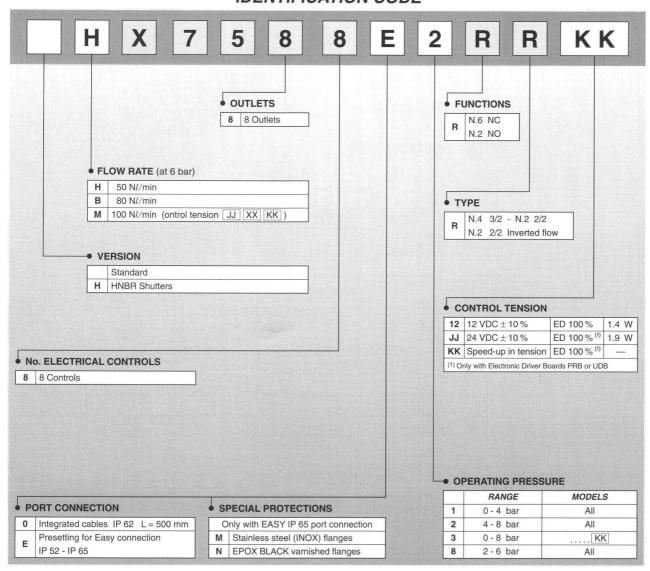

Materials

- · Body in PPS.
- · Flanges in Al.
- Seals in NBR (shutters in HNBR if required).

750 Series - 3/3

Compact solenoid multi-valve | 3/3
Function A | Outlet NO - Exhaust NC Function C | Outlet NC - Exhaust NO Function D | Outlet NC - Exhaust NC PNEUMATIC DIVISION

www.matrix.to.it sales@matrix.to.it

SOLENOID VALVES 750 SERIES • 3/3

750 Series 3/3 presents a small-sized single body with four utilities, assuming, according to the different models, the following configurations:

- NC outlet NO air drain port (function code: 'C' Exhaust center)
 This configuration allows feeding separately four pneumatic rooms and their corresponding automatic air drain port in absence of electric control.
- NC outlet NC air drain port (function code: 'D' Closed center)

 This configuration allows separately feeding four pneumatic rooms and maintaining the pressure level in absence of electric control.
- Outlet NO NC air drain port (function code 'A' Pressure center)
 This configuration allows separately feeding four pneumatic rooms and assures the continuous supply (feeding) in electric control absence.

In the present model, all the innovations offered by Matrix technology, this combines special dynamic performance to the simplicity and reliability of manufacture, are present. Response times are of millisecond range, while operation life is over 500 million cycles.

With a speed-up kind control, dynamic characteristics are even more improved. Standard 24 VDC control solenoid valves have a response time lower than 5 ms in opening and than 2 ms in closing, with a maximum operation frequency 200 Hz. Speed-up control solenoid valves have a response time lower than 2 ms both in opening and in closing, with a maximum operation frequency of 300 Hz.

Besides high-speed characteristics, 750 Series solenoid valves offer flow rate values up to 100 ℓ /minute (ANR) for every single outlet, with feeding pressure from 0 to 4 bar.

For 750 closed centres series, a lot of accessories is available, such as IP 52 or IP 56 connectors, manifolds with different positions and speed-up driver boards.

Advantages

- · Compact dimension.
- Short response times.
- Insensitivity both to frequency work and to vibrations.
- · Low absorbed power.
- Precision, repetitiveness and flexibility.
- · Long operating life.

Applications

- · Process and precision instrumentation.
- · Biomedical equipment.
- · Pressure-therapy systems.
- · Positioning systems.

Materials

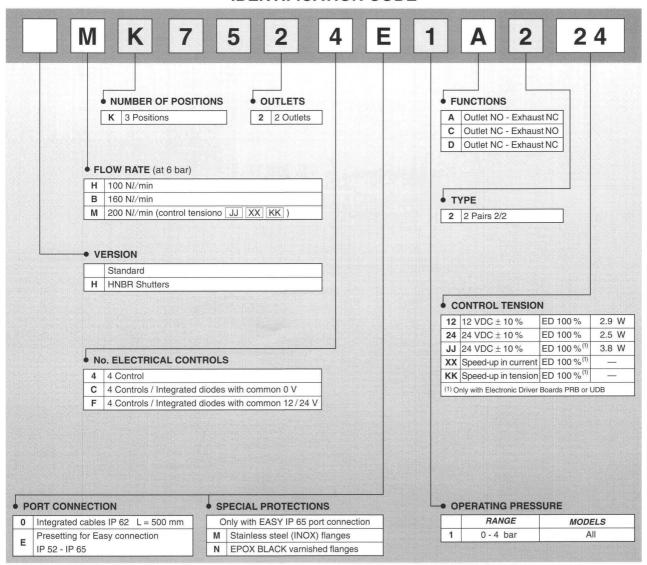

- · Body in PPS.
- · Flanges in Al.
- Seals in NBR (shutters in HNBR if required).

750 Series

Compact solenoid multi-valve | 2/2-3/2 NC-NO PNEUMATIC DIVISION

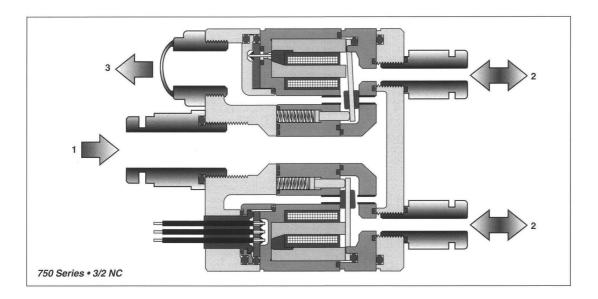

SOLENOID VALVES 750 SERIES • 2/2 • 3/2

750 Series 2/2 and 2/3 encloses in a single body eight shutters in NC or NO configuration. The series modularity allows to have at disposal a single outlet or 2, 4, 8 independent outlets. All innovations offered by Matrix technology are present. Said characteristics couple manufacturing simplicity and ability of dynamic high-performances. Response times are of millisecond range, while operation life is over 500 million cycles. The Series includes the Vacuum versions designed for uses with vacuum technique. Due to the facility to be speed-up controlled, dynamic characteristics are even more improved: standard solenoid valves equipped with 24 VDC control present response times lower than 5 ms in opening and 2 ms in closing, with a maximum operation frequency 200 Hz. On the contrary, solenoid valves equipped with speed- up control present a response time both in opening and closing lower than 2 ms, with a maximum operation frequency 300 Hz.

Besides high-speed characteristics, solenoid valves 720 Series offer flow rate value to 100ℓ /minute (ANR), with supply pressure from 0 to 8 bar.

For 750 multi-function series, a lot of accessories are available, such as IP 52 or IP 56 connectors, manifolds with different positions and speed-up driver boards.

Advantages

- · Compact dimension.
- · High duct diameter and flow rate.
- · Short response times.
- · Insensitivity to frequency work and to vibrations.
- · Low absorbed power.
- · Precision, repetitiveness and flexibility.
- · Long operating life.

Applications

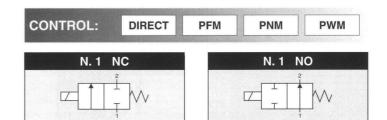

- · Process and precision instrumentation.
- Pressure and flow rate control devices.
- · Positioning systems.
- · Pilot system.
- · Selection systems.
- · Metering systems.
- · Biomedical and measure sector.

Materials

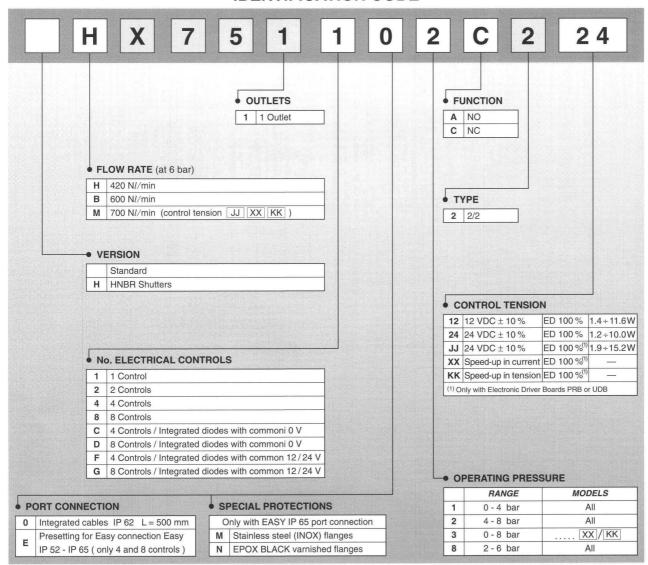

- · Body in PPS.
- Flanges in Al. (in INOX if required).
- Seals in NBR. (shutters in HNBR if required).

Integrated anti-disturbance diodes (surge voltage suppressor) 750 Series

When you interrupt feeding in an inductive circuit, the magnetic energy stored in the core zeroes. In the spire of the coil, this variation produces a contro-electromotor force, the polarity of which is inverse to that of feeding. In some cases the peak-value of this induced tension can result high and cause electromagnetic disturbance. It can also affect negatively the integrity of the driver and the insulation of the coil itself. The use of anti-disturbance diodes eliminates these phenomena.

Marginal note

Anti-disturbance diodes limit the maximum operative frequency of solenoid valves to 50 Hz.

Models available with anti-disturbance diodes

Almost all 750 series models in the catalogue can be equipped with anti-disturbance diodes which are integrated in the valve.

In this series single control models and all speed-up control versions are an exception.

How to

How to order solenoid valves with anti-disturbance diodes. Control typologies

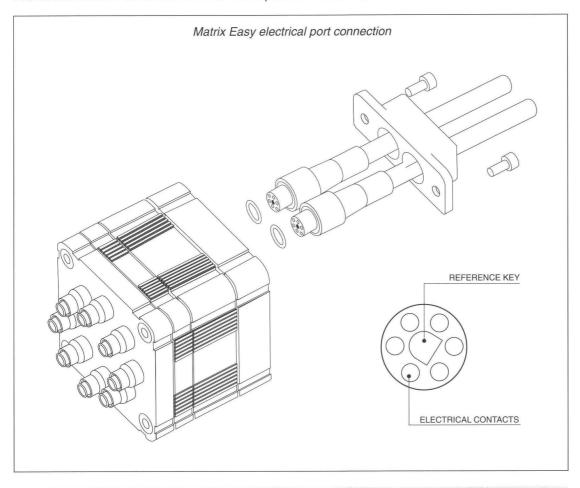

N. ELECTRICAL CONTROLS

- C 4 Controls / Integrated diodes with common 0 Volt
- D 8 Controls / Integrated diodes with common 0 Volt
- F 4 Controls / Integrated diodes with common 12/24 Volt
- G 8 Controls / Integrated diodes with common 12 / 24 Volt

Matrix Easy electrical port connection - 750 Series

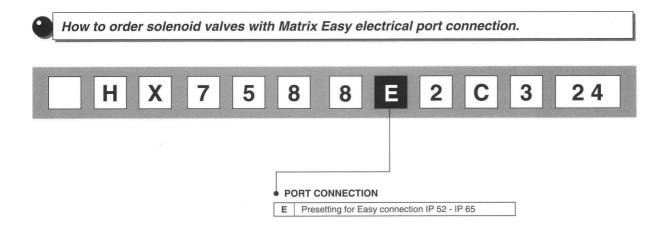

Matrix Easy port connection is suitable to use a wide range of cables which are expressly developed for 750 Series and it allows to obtain different levels of protection according to CEI EN 60947 and CEI 60529 norms.

The port connection also allows a significant simplification of electrical connections, it is consistent with 750 Series manifold and it can interface with expansion modules of this series.

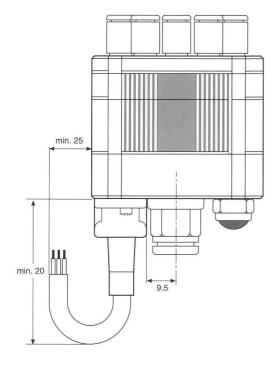

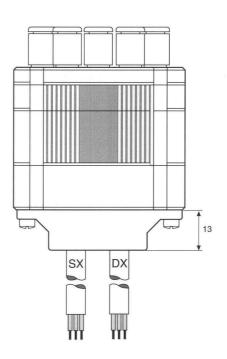

Models available with Matrix Easy electrical port connection

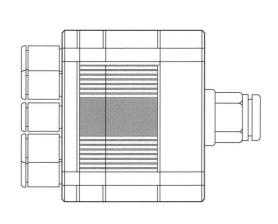

750 Series models can be equipped with Matrix Easy electrical port connection (6 poles with reference key).

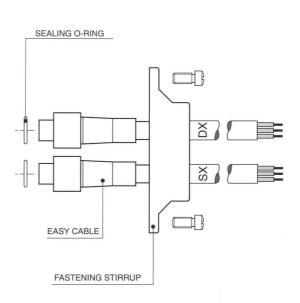

Matrix Easy electrical port connection - 750 Series

Easy IP 65 port connection cables - 750 Series

Protection rate means the intrinsic capability of electrical equipment under tension to protect and protect itself against solid bodies and water. Such protection rate is identified with the IP abbreviation followed by 2 numbers whose relative definition is established by CEI EN 60947 and CEI 60529 norms. The first number, from 0 to 6, classifies the protection against solid bodies, the second one, from 0 to 8, the protection against water.

Protection rates of Easy IP 65 port connection cables follow:

	Protection rate of coverings against solid bodies and water.		
6	Totally protected against dust	Dust penetration is not admitted	
5	Protected against water jets	Water jets thrown on the covering from all directions, must not cause damaging effects.	

Models available with IP 65 port connection cables

750 Series models come with Matrix Easy port connection and can be equipped with IP 65 cables.

Characteristics of IP 65 cable - UL 1581 and UL 758 norms		
Type of port connection on valve Matrix Easy 6 poles		
Cable diameter	6.5 mm	
Maximum temperature use	105° C for PVC - Class 43 (Style 2517) 80° C for polyurethane (Style 20235)	
Insulation	300 Volt	
Resistance against oil	ASTM 2 at 60° C	

How to order IP 65 port connection cables - Length and endings (see following page)

Cables come with assembly kit composed of fastening stirrup, fastening screws and sealing O-rings. For 4 electrical-control valves the kit is composed of a single cable. For 8 electrical-control valves the kit is composed of two cables.

1.1 Ending with soldered threads cable - 4 electrical-control valves (1 cable)

Easy IP 52 port connection cables - 750 Series

This series guarantees an IP 52 protection level according to CEI EN 60947 and CEI 60529 norms and it is consistent with all 750 Series models that come with Matrix Easy port connection. Protection rates of Easy IP 52 port connection cables follow:

	Protection rate of coverings against solid bodies and water		
5	Protected against dust	Dust penetration is not totally excluded but dust must not penetrate in such a quantity that could damage the good working of the equipment or jeopardise its safety.	
2	Protected against vertical fall of water drops with an inclination of the covering until 15°.	The water drops which fall vertically must not cause damaging effects when the covering is inclined until 15° in comparison with its vertical position.	

Characteristics	Characteristics of IP 52 cable - UL 1569 norms	
Type of port connection on valve	Matrix Easy 6 poles	
Threads diameter	1.4 mm	
Conductor diameter	AWG 24	
Maximum temperature use	105° C	
Insulation	300 Volt	
Covering threads	PVC (polyvinyl chloride)

Manifold - 750 Series

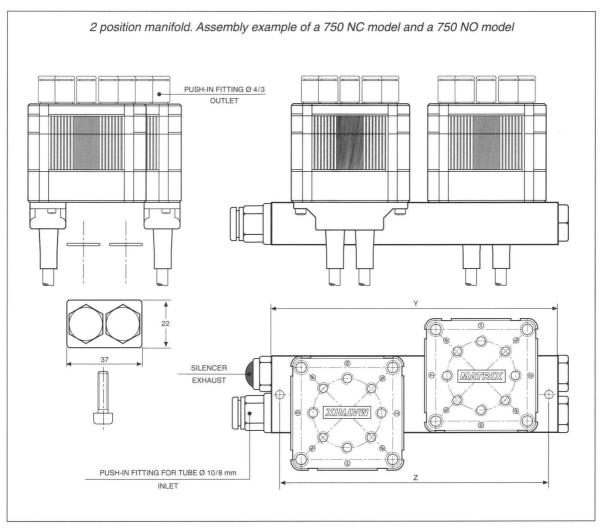

Manifolds for multiple installing represent a fast and safe system of fastening and connection for all 750 Series models

They are suitable for the rationalisation of complex pneumatic systems thanks to their simplicity of the assembly and their total modularity.

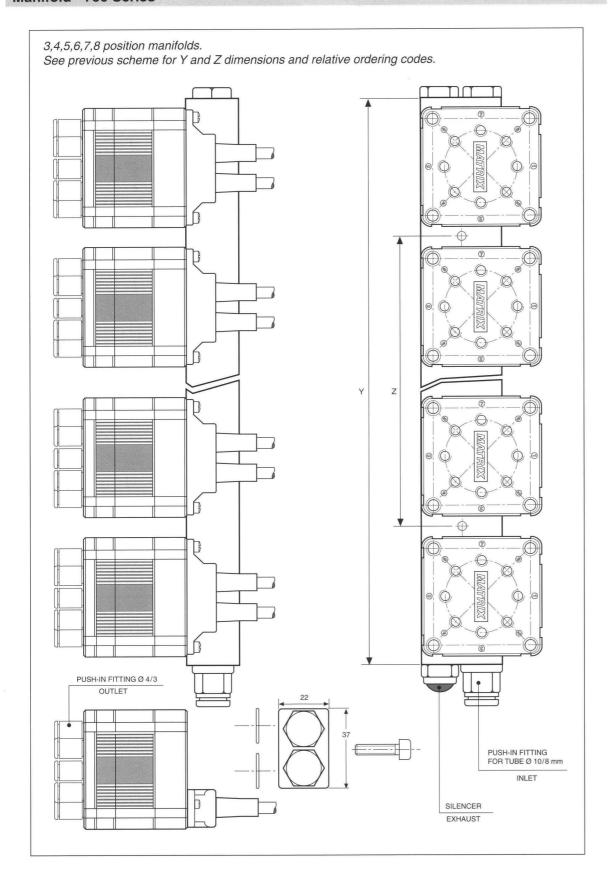

Manifolds are available for patterns from 2 to 8 solenoid valves of 750 series and are consistent with Matrix Easy electrical port connection and cables. They come in kit with fastening screws, push-in fittings and sealing O-Rings.

How to order Manifolds - Available patterns

Pattern	Kid code	Y (mm)	Z (mm)
no. 2 Solenoid valves	868.950 E	140	130
no. 3 Solenoid valves	868.951 F	195	65
no. 4 Solenoid valves	868.952 G	260	130
no. 5 Solenoid valves	868.953 H	325	195
no. 6 Solenoid valves	868.954 I	390	260
no. 7 Solenoid valves	868.955 J	455	325
no. 8 Solenoid valves	868.956 K	520	390

SOLENOID VALVES 750 SERIES • 5/2

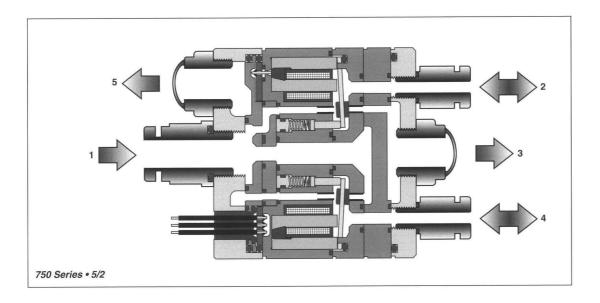

5/2 750 Series encloses 8 shutters in a single body, four in NC configuration and four in NO configuration. Shutters are placed in NC - NO couples and every couple is combined to a single control, providing the change of function.

The 8 outlets of the solenoid valve are also placed in an alternated NC - NO sequence and every couple is prearranged to control a double-acting cylinder.

The models present all the innovations offered by Matrix technology, combining dynamic high-performance with the simplicity and reliability of the manufacture. Response times are of milliseconds while operating life lasts over 500 million cycles.

Due to the control of speed-up type, dynamic characteristics are even more improved. Standard solenoid valves have a response time lower than 5 ms in opening and in closing, with a maximum operating frequency of 100 Hz.

For 5/2 750 series, a lot of accessories are available, such as IP 52 or IP 56 connectors, manifolds with different positions and speed-up driver boards.

Advantages

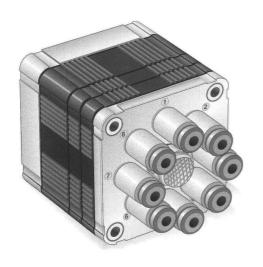

- · Compact dimension.
- · Short response times.
- Insensitivity to frequency work and to vibrations.
- · Low absorbed power.
- · Precision, repetitiveness and flexibility.
- · Long operating life.

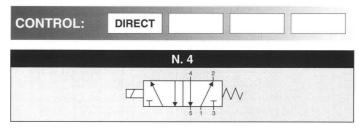

Applications

- Process and precision instrumentation.
- · Industrial automation.
- · Robotics.
- · Positioning systems.
- · Piloting.

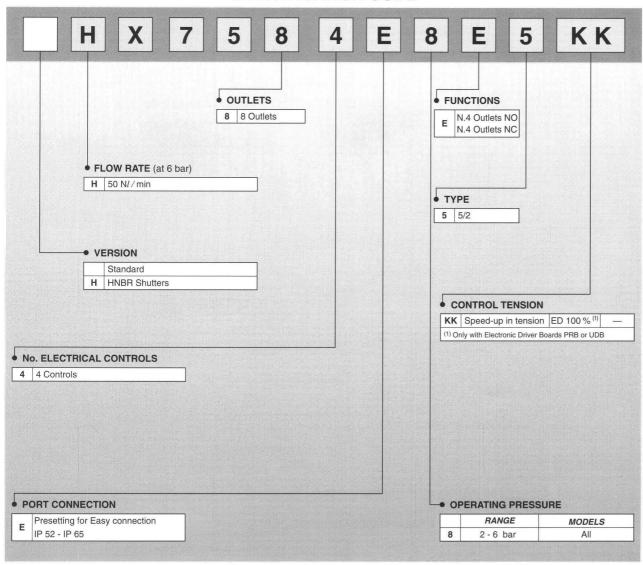

Materials

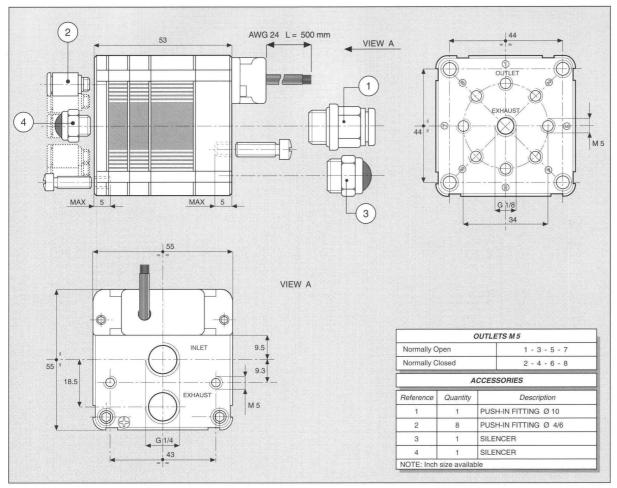

- · Body in PPS.
- · Flanges in Al.
- Seals in NBR (shutters in HNBR if required).

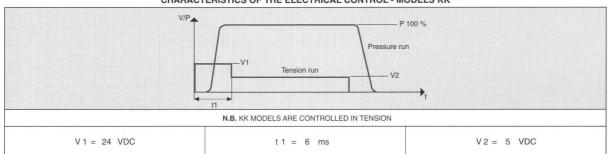

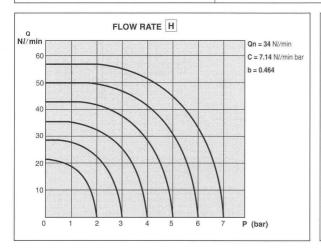

FLUID	Non-lubricated dry air, neutral gases (-10 + 50°C)
FILTRATION RATING	Min 40 micron
TEMPERATURE	- 10 + 50°C (Standard version)
RESPONSE TIME IN OPENING	KK < 5 ms
RESPONSE TIME IN CLOSING	KK < 5 ms
MAXIMUM FREQUENCY	100 Hz
WEIGHT	380 g
PRODUCT LIFE EXPECTANCY	≥ 500 M/s cycles
IP RATING	IP 52 - IP 65
